

Driverite Semi-Air Suspension Kits are suitable for all X250 vehicle applications - Trucks, Motorhomes, Minibuses, Vans, Ambulances, etc. The air helper springs are installed between the frame of the vehicle and the suspension providing load support through the use of air pressure.

These air springs are manufactured by Firestone who have made a commitment to provide the customer with the best air helper spring kits in the industry. Driverite have been fitting quality Fiat approved semi-air kits to the Ducato models since 1988.

The Driverite semi-air suspension kit utilizes a pair of convoluted air spring capable of 2500 kgs of load carrying per set. It is extremely important to remember that air helper springs do not increase a vehicle's carrying capacity. Although the air springs are capable of lifting a great deal of weight they are intended to maximize the vehicle's load capabilities within the Gross Vehicle Weight Rating (GVW).

Fiat X250 Kit Fitted

The Driverite X250 Semi-Air Suspension Kit Will:

Keep your vehicle level - improve steering control and breaking effectiveness, level headlight beams and reduce tyre wear.

Level off-centre loads - individual inflation valves allow for side-to-side adjustment.

Reduce suspension fatigue - keep leaf springs from sagging under repeated or constant load.

Air adjustment improves the ride quality - allowing the air springs to be matched to the load.

Reduce bottoming out - protective air cushion softens contact between the axle and frame.

Increase vehicle stability - absorbing road shock providing ideal ride conditions for passengers and load.

Air Accessory Systems

Upgrade your basic air suspension kit with a Driverite - Firestone air accessory system to provide an instant source of air for your vehicle. Manual or automatic kits are available to suit your particular vehicle requirements. Below are a couple of options available - please see our website for a complete list of kits available - www.driveriteltd.com.
